

1. Background

Figure 14 displays domestic (blue), export (red), and import (patterned gray) movements of bulk commodities in short tons (millions). Categories include iron ore, limestone, coal & lignite, petroleum coke, salt, cement & concrete, and more. Labels for “ Domestic,” “ Exports,” and “ Imports ” appear centered above each group.

2. Text Contrast

The figure uses dark gray text on a white background, producing strong readability. Category labels are angled but readable. Contrast Scores: Computed WCAG Contrast Ratios (Figure 14): • Blue vs White: 3.78 • Blue vs Black: 5.56 • Red vs White: 5.19 • Red vs Black: 4.04 • Gray vs White: 2.07 • Gray vs Black: 10.13

3. Graphic (Slice) Contrast

The graphic uses three distinct visual encodings—solid blue, solid red, and patterned gray. This ensures strong differentiation between commodity movement types. Since categories appear once per group, separating via bar height rather than color variations remains acceptable.

4. Color-Blind Safety

Blue, red, and patterned gray remain distinguishable under common color-blindness conditions. The patterned encoding for imports provides a non-color cue, meeting ADA/WCAG requirements. No meaning depends solely on hue.

5. OCR / Text Size

Category labels, axis titles, and the group labels are sufficiently large for OCR extraction. Angled category text remains readable. No text overlaps bars, so OCR parsing is unobstructed.

6. Blur & DPI

Bar edges and hatch patterns appear clean at current resolution. For printing or archival ADA documents, a 300-DPI export is recommended to avoid moiré effects in the patterned import bars.

7. Alt Text Recommendation

“ Bar chart showing domestic (blue), export (red), and import (patterned gray) short-ton volumes in millions across major commodities. Domestic values range from ~5M to ~75M tons. Export values include small quantities of limestone, coal & lignite, petroleum coke, and salt. Imports appear as patterned bars representing salt, sand & gravel, cement, iron & steel sheets, and limestone, all under 10M tons. ”
