

1. Background

Figure 14 presents domestic (blue), export (red), and import (patterned gray) commodity movements in short tons (millions). Categories include iron ore, limestone, coal & lignite, petroleum coke, cement & concrete, and salt. Group labels (“ Domestic, ” “ Exports, ” and “ Imports ”) are centered above the respective bar clusters.

PASS

2. Text Contrast

The figure uses dark-gray text on a white background, providing strong readability. Contrast Scores: Computed WCAG Contrast Ratios (Figure 14): • Blue vs White: 3.78 • Blue vs Black: 5.56 • Red vs White: 5.19 • Red vs Black: 4.04 • Gray vs White: 2.07 • Gray vs Black: 10.13 Gray vs white contrast (2.07) is below WCAG AAA for text—but this gray is used **only for data bars, not text**, so it does NOT trigger failure.

PASS

3. Graphic (Slice) Contrast

The chart uses three distinct encodings—blue, red, patterned gray. Even with low gray–white contrast, the hatch pattern preserves distinguishability, which satisfies ADA non-text-contrast requirements.

PASS

4. Color-Blind Safety

Blue, red, and patterned gray remain distinguishable under all major color-blind simulations. Imports have redundant non-color encoding (pattern), meeting ADA/WCAG requirements.

PASS

5. OCR / Text Size

Commodity labels, axis labels, and group labels are sufficiently large for OCR extraction. Angled labels remain readable. No text is embedded inside bar shapes.

PASS

6. Blur & DPI

Edges and hatch patterns render cleanly. For accessibility-compliant publication or printing, a 300-DPI export is recommended.

PASS

7. Alt Text Recommendation

“ Bar chart showing domestic (blue), export (red), and import (pattern-gray) short-ton volumes across major commodities. Domestic values range from ~5M to ~75M tons; exports include small volumes of limestone, coal & lignite, petroleum coke, and salt; imports include salt, sand & gravel, cement, iron & steel sheets, and limestone, all under 10M tons. ”
