

1. Background

Figure 15 displays domestic (blue), export (red), and import (patterned gray) flows of major energy-related commodities in short tons (millions). Categories include distillate fuel oil, gasoline, crude petroleum, soybeans, hydrocarbon gases, petroleum coke, cement & concrete, iron ore, and more.

PASS

2. Text Contrast

The figure uses dark-gray labels on a white background, preserving readability. Contrast Scores: Computed WCAG Contrast Ratios (Figure 15): • Blue vs White: 3.78 • Blue vs Black: 5.56 • Red vs White: 5.19 • Red vs Black: 4.04 • Gray vs White: 2.07 • Gray vs Black: 10.13 Low gray-white contrast applies only to import bar fills, **not text**, so ADA text contrast is not violated.

PASS

3. Graphic (Slice) Contrast

Blue, red, and pattern-gray categories are clearly distinguished. The hatch pattern ensures import bars remain visually separate even when contrast alone could be insufficient.

PASS

4. Color-Blind Safety

All three encodings remain distinguishable under major color-blind simulations. Patterns provide required non-color redundancy for imports.

PASS

5. OCR / Text Size

Commodity labels and axis text are large enough for OCR extraction. No label overlays any bar, ensuring clean capture.

PASS

6. Blur & DPI

Hatch patterns and bar edges appear sharp. A 300-DPI export is recommended for federal accessibility documentation.

PASS

7. Alt Text Recommendation

“ Bar chart showing domestic (blue), export (red), and import (pattern-gray) short-ton volumes for energy commodities. Domestic values range from ~25M–70M tons; exports include hydrocarbon gases (~185M), distillate fuel oil, petroleum coke, and gasoline; imports include crude petroleum (~70M), distillate fuel oil (~30M), cement & concrete (~10M), iron & steel forms, and iron ore (<10M). ”
