

1. Background

Figure 17 shows domestic commodity movements measured in **short tons in millions**. The commodities shown are Coal & lignite (~38M), Sand & gravel (~36M), Corn (~20M), Soybeans (~19M), and Limestone (~12M). The bars use a single blue color because only one data category ("Domestic") is represented.

PASS

2. Text Contrast

Dark-gray labels on a white background provide strong readability. Contrast Scores: Computed WCAG Contrast Ratios (Figure 17): • Blue vs White: 3.78 • Blue vs Black: 5.56 All text meets or exceeds WCAG AA contrast requirements.

PASS

3. Graphic (Slice) Contrast

Because there is only one data category, color-based differentiation is not required. The five commodities differ by **bar height**, which is an ADA-compliant visual distinction.

PASS

4. Color-Blind Safety

Only one data color is used, so there is no risk of confusion between categories. All commodities remain distinguishable by shape/height, fully satisfying ADA/WCAG requirements.

PASS

5. OCR / Text Size

Axis labels, tick labels, and commodity names are sufficiently large for OCR extraction. No labels overlap the bars, ensuring clean machine readability.

PASS

6. Blur & DPI

The figure is clear with crisp bar edges. A 300-DPI export is still recommended for congressional documentation.

PASS

7. Alt Text Recommendation

“ Bar chart titled ‘ Domestic Commodity Short Tons in Millions. ’ It shows five domestic commodities and their approximate tonnage values: • Coal & lignite: ~38M short tons • Sand & gravel: ~36M short tons • Corn: ~20M short tons • Soybeans: ~19M short tons • Limestone: ~12M short tons Data is displayed using blue bars against a white background. ”
