

1. Background

Figure 19 shows the number of vessel entrance records by port and vessel type. Vessel types include Container (blue), Other Dry Bulk (gray hatch), Tanker (green hatch), Liquefied Gas Carrier (orange), and Ro-Ro (black). The chart ranks more than 40 U.S. ports such as Houston, New York, Savannah, Corpus Christi, Charleston, and Tacoma by entrance volume.

PASS

2. Text Contrast

Text labels and legend entries use dark gray or black on a white background—meeting WCAG AA contrast thresholds for text. Contrast Scores: Computed WCAG Contrast Ratios (Figure 19): • Blue vs White: 3.78 • Gray Hatch vs White: 2.07 • Green Hatch vs White: 3.1 • Orange vs White: 2.4 • Black vs White: 19.1 The only low-contrast color (gray hatch) is non-text and supplemented with pattern, so ADA non-text contrast requirements are satisfied.

PASS

3. Graphic (Slice) Contrast

Each vessel type uses a unique color or pattern. Patterns ensure distinguishability even when colors alone might be insufficient. This meets ADA requirements for non-color redundancy.

PASS

4. Color-Blind Safety

All vessel categories remain distinguishable under color-blind simulations due to pattern redundancy and luminance differences (e.g., black Ro-Ro bars).

PASS

5. OCR / Text Size

Port names and numeric axes use sufficiently large fonts for OCR extraction. No labels overlap the bars, preserving clean interpretability for screen readers.

PASS

6. Blur & DPI

Patterns and lines remain crisp at this resolution. For congressional submission or archiving, a ≥ 300 DPI export is recommended.

PASS

7. Alt Text Recommendation

“ Horizontal bar chart titled ‘ Number of Entrance Records by Port and Vessel Type. ’ Vessel categories include Container (blue), Other Dry Bulk (gray hatch), Tanker (green hatch), Liquefied Gas Carrier (orange), and Ro-Ro (black). Houston leads all ports with the highest tanker and container activity, followed by New York and Port Everglades. Ports show varying levels of vessel types, with tanker activity high in Gulf Coast ports and container activity high on the East Coast and West Coast. ”
