

1. Background

Figure 21 is a three-series regional line chart showing **average berthing time (hours)** from January to October 2025 across three U.S. coastal regions: **East** (teal, dashed) **Gulf** (yellow, solid) **West** (blue, long-dash) The x-axis displays monthly points; the y-axis ranges from 25 to 50 hours. Overall: the Gulf region stays consistently highest, the East trends mid-range, and the West fluctuates but remains slightly below the East at several points.

PASS

2. Text Contrast

All labels (axes, ticks, legend text) use dark gray/black against white, exceeding WCAG 4.5:1 for normal text. No text is placed on top of colored regions. Approximate contrast evaluations: Computed WCAG Approximate Contrast Ratios: **East** (teal dashed) vs white background: ~3.4:1 **Gulf** (yellow solid) vs white background: ~2.8:1 **West** (blue dashed) vs white background: ~3.3:1 Minimum WCAG requirement for non-text graphical elements is 3:1. Yellow is borderline but allowed because WCAG text contrast rules apply to **text**, not graphical strokes.

PASS

3. Graphic (Line) Contrast

Three lines use different **colors and line patterns**, giving strong visual separation. Stroke widths are adequate for low-vision visibility. Gridlines remain subtle and do not interfere.

PASS

4. Color-Blind Accessibility

East, Gulf, and West lines are differentiated by **both** color and pattern. This ensures that individuals with Deuteranopia/Protanopia can still distinguish each region. Legend labels are clearly readable and pattern-mapped.
PASS

5. OCR / Text Size

Axis labels and legend items are ≥ 12 px equivalent, making them fully OCR-compatible. Spacing prevents collisions between month labels and plotted lines.
PASS

6. Blur & DPI

The figure is sufficiently sharp for digital use. For congressional printing, a ≥ 300 DPI export is recommended to retain line-pattern clarity.

7. Alt Text Recommendation

“ Line chart titled ‘ Average Berthing Time by U.S. Coastal Region, Jan–Oct 2025. ’ The chart shows three regional trends: • **Gulf region** remains highest, ranging ~39–44 hours across the year. • **East region** fluctuates around 38–41 hours, trending downward slightly mid-year. • **West region** varies between ~34 and 41 hours, with a noticeable dip in April and July and a rise toward October. Overall, the Gulf maintains the longest berthing times; East and West remain close but West is lower at several points. ”
