

ADA Compliance Report – Figure 26

1. ****Image Title & Description****

Line chart showing U.S. imports (millions of short tons) from January 2022 to May 2025. The values fluctuate between roughly 2.7 and 6.3 million short tons, with the highest spike occurring mid-2022 and a general downward trend into 2025.

2. ****Alt Text (508 Compliant)****

"Line chart of monthly U.S. import volumes from Jan-2022 to May-2025. Imports peak near 6.3 million tons in mid-2022, decline through 2023 with intermittent rebounds, fall to around 2.7 million tons in early 2024, then stabilize mostly between 3.0–4.0 million tons through mid-2025."

3. ****Color & Contrast Score: PASS****

Single dark blue line on a white background. No color-dependent interpretation required.

4. ****Typography & Labeling Score: PASS****

Axis labels ("Imports (millions of short tons)" and date labels) are clear, sufficiently large, and readable. No condensed or low-contrast text present.

5. ****Data Complexity & Cognitive Load Score: PASS****

One variable displayed over time. Trend is easy to follow, and no overlapping lines.

6. ****Assistive Technology Compatibility Score: PASS****

No text embedded inside the graphic that would be lost to screen readers. Alt text captures the functional meaning.

7. ****Overall Accessibility Verdict: PASS****

The visualization is compliant with ADA/508 expectations. Alt text captures key trends and provides meaningful interpretation without overwhelming detail.
